Subject: DEC issued SPDES permit for STAMP
Attachments: Permit.IndSPDES.NY0272078.2022-2022-09-02 signed.pdf; RTC.IndSPDES.NY0272078.2022-09-02.pdf; SPDES Comments Combined.pdf

Hi EPA friends,

DEC issued the SPDES permit for the STAMP project's discharge into impaired Oak Orchard Creek this Friday. I didn't see you included on the distribution emails, so I wanted to make sure that you have received these documents.

We are still reviewing these documents, but we are particularly concerned about DEC's unsupported conclusion that the conversion from farm land to industrial land will offset the phosphorus loading into Oak Orchard Creek, particularly when DEC has not complete a load and wasteload allocation for the impaired creek. We are happy to discuss these developments at your convenience.

Thank you,
Jill
